

Setting up Application Environment

Docker CLI Installation

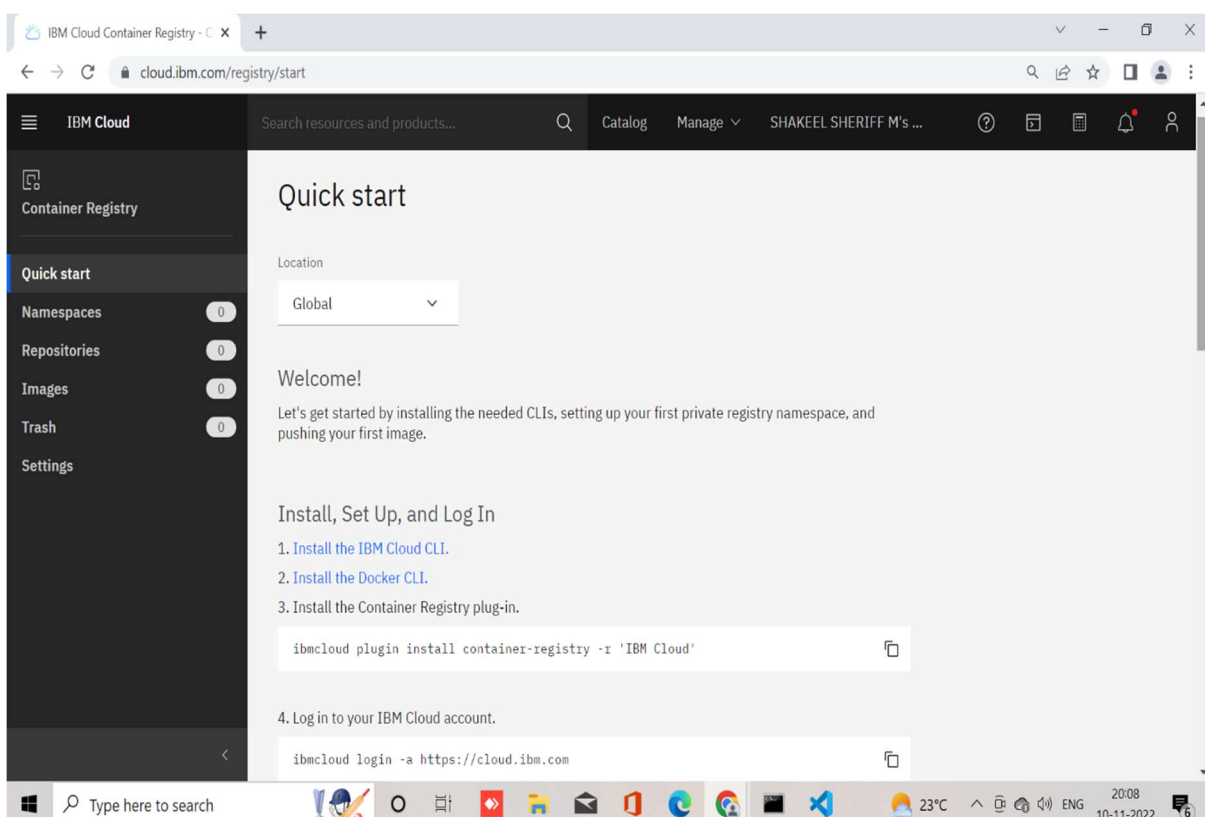

Date	06/11/2022
Team Id	PNT2022TMID47490
Project Name	Plasma Donor Application
Maximum Marks	4 Marks

Step 1: Login to cloud account

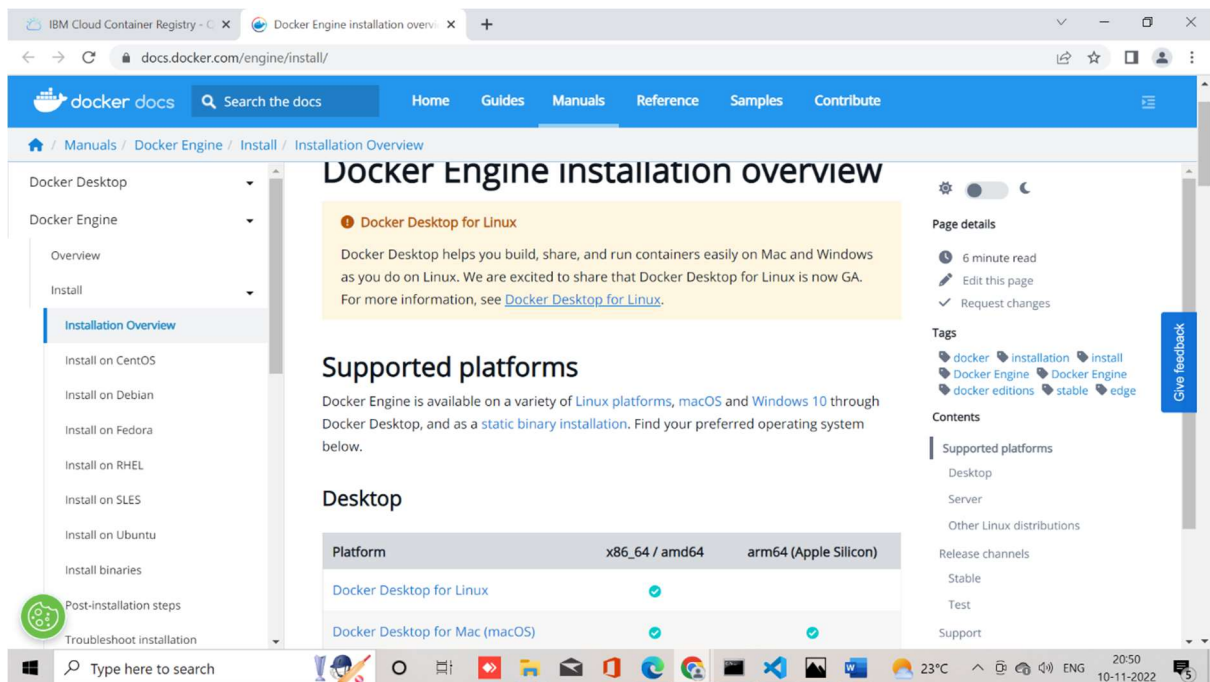

The screenshot shows the IBM Cloud Dashboard in a web browser. The browser address bar displays 'cloud.ibm.com'. The dashboard header includes the IBM Cloud logo, a search bar, and navigation links for 'Catalog', 'Manage', and a user profile. The main content area is titled 'Dashboard' and features a 'For you' section with five recommended actions: 'Build' (Explore IBM Cloud with this selection of easy starter tutorials and services.), 'Build a data lake' (Create a data lake using Object Storage and query it in its native format with SQL Query and Watson Studio.), 'Explore IBM Cloud Shell' (Try a command-driven approach for creating, developing, and deploying a web project.), 'Accelerate delivery of static files' (Host website assets in Cloud Object Storage, and use a CDN for fast and secure delivery to users around the world.), and 'Use Cloud Foundry' (Deploy and run your applications without managing servers or clusters with IBM Cloud Foundry.). Each action includes a 'Recommended' badge and a time estimate. Below the 'For you' section, there are links for 'User access', 'News', and 'Planned maintenance'. The bottom of the dashboard shows a search bar and a taskbar with various application icons.

Step 2: click container registry

The screenshot shows the IBM Cloud Container Registry 'Quick start' page. The browser address bar displays 'cloud.ibm.com/registry/start'. The page header includes the IBM Cloud logo, a search bar, and navigation links for 'Catalog', 'Manage', and a user profile. The left sidebar contains a 'Container Registry' section with a 'Quick start' link. The main content area is titled 'Quick start' and features a 'Location' dropdown menu set to 'Global'. Below this, there is a 'Welcome!' message and a list of steps to get started: 1. Install the IBM Cloud CLI., 2. Install the Docker CLI., 3. Install the Container Registry plug-in., and 4. Log in to your IBM Cloud account. The third step includes a code snippet: `ibmcloud plugin install container-registry -i 'IBM Cloud'`. The fourth step includes a code snippet: `ibmcloud login -a https://cloud.ibm.com`. The bottom of the page shows a search bar and a taskbar with various application icons.

Step 3: Click quick start and install the Docker CLI for Windows

Step 4: click next and setup finish
